Principal divisional activities related to senior management positions

These roles involved operations and development oversight of statistical programs including human resources, financial management, strategic planning, internal survey operations co-ordination (for collection, methodology, IT, analytical, dissemination, communications services) and external engagement (data providers and users, stakeholders including program sponsors and international organizations).

July 2015 - Director, Investment, Science and Technology Division (ISTD)

Economy Wide Statistics Branch, Economic Statistics Field

- ISTD covers a portfolio of over 30 statistical programs in two subdivisions covering a diverse subject matter domain: Digital Economy, Science/Technology, Research and Development and Innovation, Capital Expenditures, Public Infrastructure, Building Permits and Investment in Construction, Property Values (Fiscal Arrangements for Equalization) and the Canadian Housing Statistics Program, a 5 year \$40 million project to create a national housing research database covering approximately 5000 municipalities built primarily from administrative data sources.
- 120 + staff

April 2010 - July 2015 Assistant Director, Consumer Prices Division (CPD)

- Oct 2014 – Jul 2015 Production Subdivision
 - The Consumer Prices Program produced Statistics Canada’s flagship monthly mission critical statistical program measuring consumer price change across 19 strata; spatial index measures in 13 cities; data collection for the OECD purchasing prices parity program; and, the Isolated and Foreign Post indexes, a cost recovery program for the Treasury Board of Canada establishing cost of living differentials for GOC civilian, diplomatic and military personnel and travel rates for public servants.
 - 76 staff

- Apr 2010 – Oct 2014 Development Subdivision, Project Manager Consumer Price Index Enhancement Initiative (CPIEI)
 - The CPIEI was a 5 year, \$50 million, Treasury Board Level 3 complexity, project to improve the CPI through the development and implementation of more scientific sampling and price index methodologies, expanded data collection, more frequent and timely basket updates, improved quality adjustment methodologies, the creation of a new index aggregation system and updates to the CPI statistical program's processing and collection systems and business processes.
 - 50 staff

2007 – 2010 Assistant Director, Industrial Organisation and Finance Division (IOFD)

- I was responsible for the Enterprise sub-Division which produced a quarterly mission critical survey – the Quarterly Survey of Financial Statistics for Enterprises (QFS) providing key inputs (profits, financial flows, balance sheet accounts) into the SNA for the business sector and to the Bank of Canada; and an annual statistical program (Annual Financial and Taxation Statistics Program – AFTS) based on administrative (CRA taxation) files covering 1.2 million enterprises. Outputs from this program were used to provide a baseline to the QFS, provide asset and revenue aggregates for measuring foreign control in the economy and a data base for a stand alone CD-ROM product measuring financial performance for some 800,000 enterprises - Financial Performance Indicators for Canadian Business (FPICB) and finally an annual cost recovery based program - the Survey of Suppliers of Business Financing (SSBF), used chiefly by Industry Canada.
- 30 – 40 staff
